A weekly brief: what changed, and what it means for our buildings

Discover

Opportunities that fit our mandate. Only those the analyst approves reach the team

The working app, answering a question on City rents

1 · TIME SAVING

Routine research now takes minutes

~15 sec
per answer

Compare the brokers on any figure

Today Open six broker reports, find the figure, check each definition
Now One table with every broker's figure, each linked to its source

~1 min
per brief

Write the weekly market brief

Today Read the news across many outlets, then write it up
Now A first draft in a set format, with every figure checked

~2 min
per scan

Screen the week for opportunities

Today Read news and insolvency notices against the mandate by hand
Now Up to five leads investigated and written up as cards

Each one costs a few US cents of AI usage, under US$0.10.

Measured in test runs on 24–25 Oct 2026: answers median 13 s (16 runs), brief 31–76 s, scan 56–115 s until the cards are ready. How long the same work takes by hand is still to be measured.

A market memory that stays with the team

WHAT IT KEEPS, IN OUR OWN DATABASE

Broker figures
Rents, vacancy, yields and more

News and notices
Each story with its link and date

Our own records
Policies, committee notes, decisions

The team's calls
Every approve or reject, and why

WHY IT MATTERS

Same question, same number
One shared record for the whole team

Every figure is traceable
One click opens the original source

Knowledge stays with the team
Past decisions stay searchable

It grows in value
History builds; new sources plug in

Broker figures come from JLL, Savills, BNP Paribas, Cushman & Wakefield, CBRE and Avison Young. In the demo, the internal records are mock examples; real ones need an access review before loading.

3 · OPPORTUNITY DISCOVERY

Spots opportunities that fit Nan Fung

Most London office deals trade off-market, so hearing early matters.

1. **Reads**
   The week's news and insolvency notices
2. **Matches**
   Against our mandate and our buildings
3. **Investigates**
   Up to five leads, each double-checked
4. **You decide**
   Only approved cards reach the team

EXAMPLE FROM THE DEMO · TEST DATA

Owner under pressure | City Core

Administrators appointed to the owner of a 45,000 sq ft City office

What it means for us: bought in 2018 on a five-year loan; fits our City mandate

What to do next: confirm at Companies House and contact the administrator

Approve | Reject

Off-market share: 69% of City deals (H1 2019, Bisnow) and 76% of West End volume (July 2022, Savills). The example is built on a test notice and an illustrative mandate.

London Office Brief — 24 October 2026

What changed

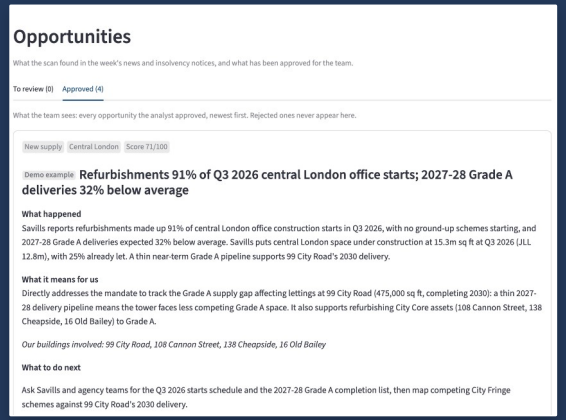

- City Core prime rent rose from £95.00 to £100.00 psf, up £5.00 (+5.26%) Q2–Q3 on JLL's series [F68][F57].
- West End prime rent rose from £190.00 to £195.00 psf, up £5.00 (+2.63%), JLL [F65][F56].
- Central London take-up rose from 2.6m to 3.1m sq ft, up 0.5m sq ft (+19.23%), JLL [F59][F50].
- Central London vacancy fell from 8.6% to 8.3%, down 0.3pp, JLL [F60][F51].
- Central London space under construction fell on both series: JLL 14.4m → 12.8m sq ft (−11.11%) [F63][F54]; Savills 16.1m → 15.3m sq ft (−4.97%) [F37][F46].

News themes

- Occupier demand: Chiswick Park secured 72,500 sq ft of lettings, including Pierre Fabre (7,000 sq ft) and Air China (4,000 sq ft) [D41#0].
- Business rates: September inflation of 3.5% (up from 3.1%) triggers a £1.1bn rates hike from next April [D54#0]; the City of London Corporation is weighing a multiplier rise to cover a £70m budget shortfall [D5#0]; New West End Company urged the Chancellor to curb "eye-watering" rates [D44#0].
- Development: Sir George Iacobescu is betting on London development while others hold back, from Canary Wharf to new projects [D59#0].
- Distress: the Al Tajir family's UK property empire faces loan defaults and creditor action as lenders try to recoup unpaid debts [D118#0].
- Investment: South East and Greater London volumes reached £389m in Q3, the strongest quarter of 2026, with year-to-date up 4% at £915m [D31#0].

New supply · Central London · Score 71/100

Demo example **Refurbishments 91% of Q3 2026 central London office starts; 2027-28 Grade A deliveries 32% below average**

What happened

Savills reports refurbishments made up 91% of central London office construction starts in Q3 2026, with no ground-up schemes starting, and 2027-28 Grade A deliveries expected 32% below average. Savills puts central London space under construction at 15.3m sq ft at Q3 2026 (JLL 12.8m), with 25% already let. A thin near-term Grade A pipeline supports 99 City Road's 2030 delivery.

What it means for us

Directly addresses the mandate to track the Grade A supply gap affecting lettings at 99 City Road (475,000 sq ft, completing 2030): a thin 2027-28 delivery pipeline means the tower faces less competing Grade A space. It also supports refurbishing City Core assets (108 Cannon Street, 138 Cheapside, 16 Old Bailey) to Grade A.

Our buildings involved: 99 City Road, 108 Cannon Street, 138 Cheapside, 16 Old Bailey

What to do next

Ask Savills and agency teams for the Q3 2026 starts schedule and the 2027-28 Grade A completion list, then map competing City Fringe schemes against 99 City Road's 2030 delivery.
